

RRC 220 Lab Coater

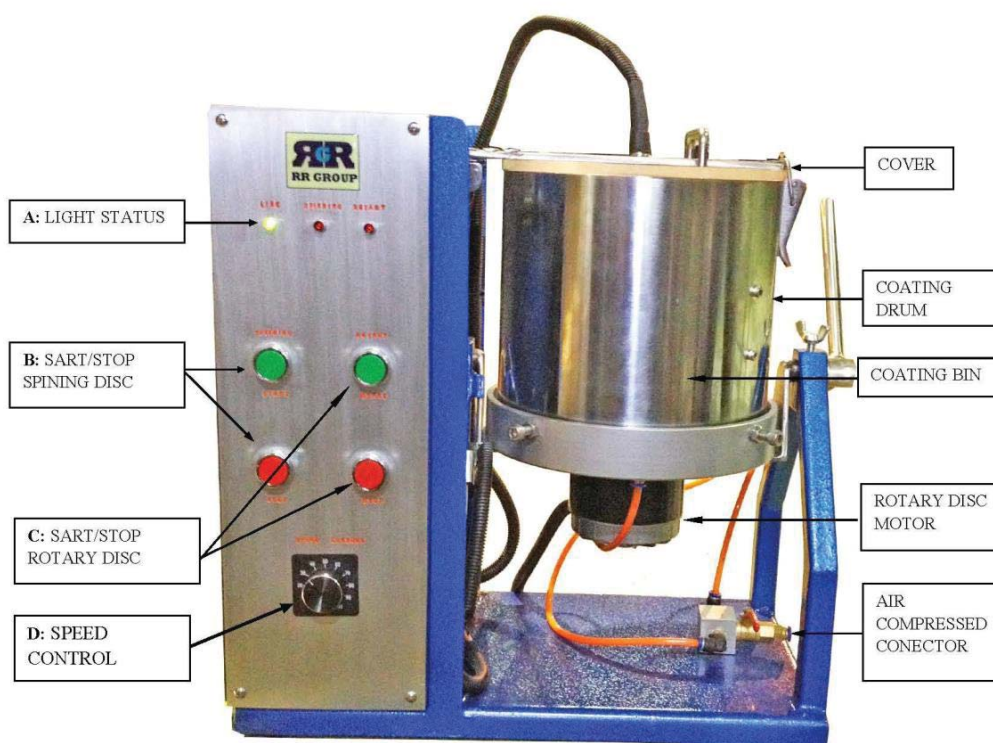

- Suitable for all vegetable seeds and field crops.
- Specially designed for small amount of seed coating
- Development of coating recipes
- Perfect for coating and pelleting
- Easy to use
- The best quality/price ratio

Technical Data

Mixing system	Rotor-Stator-Principle
Treatment distribution	Liquid by spinning disk, directly (manually), powder directly (manually)
Batch quantity	100 – 1,000 g
Max. Cap/Hour	Only manual
Compressed air requirement	Not necessary, but advised connection and control pressure available of the valve.
Dimensions	W290mmxL520mmxH520mm
Total Weight	29.5 kg
Mixing chamber	220 mm (Ø) x 220 mm (h)

Power supply	Rotary disk	350 W 24 VDC
	Spinning disk	15W 12 VDC
	Total power consumption	180 W 220 VAC
	Adaptation to other power supplies are possible
