

RRC 450 Manual Seeds Coater

RRC 450 Manual Coater

- Suitable for vegetable seeds and field crops.
- Excellent recovery
- Outstanding distribution
- No seed damage
- Can use for Pelleting seeds
- Easy to use
- The best quality/price ratio

Technical Data

Mixing system	Rotor-Stator-Principle
Treatment distribution	Liquid by spinning disk, directly (manually), powder directly (manually)
Batch quantity	2-10 kg
Max. Capacity/Hour	100 - 600 kg/hour
Compressed air requirement	6 - 8 bar;550 liters/min; 165 Liters
Dimensions	W 750 mm./ L 820mm./ H 1050 mm.
Mixing chamber	450 mm (Ø) x 380 mm (h)
Total Weight	500 Kg. (approximately)
Peristaltic pump	Optional
Mixing tank	Optional ; recommend 30-50 Liters

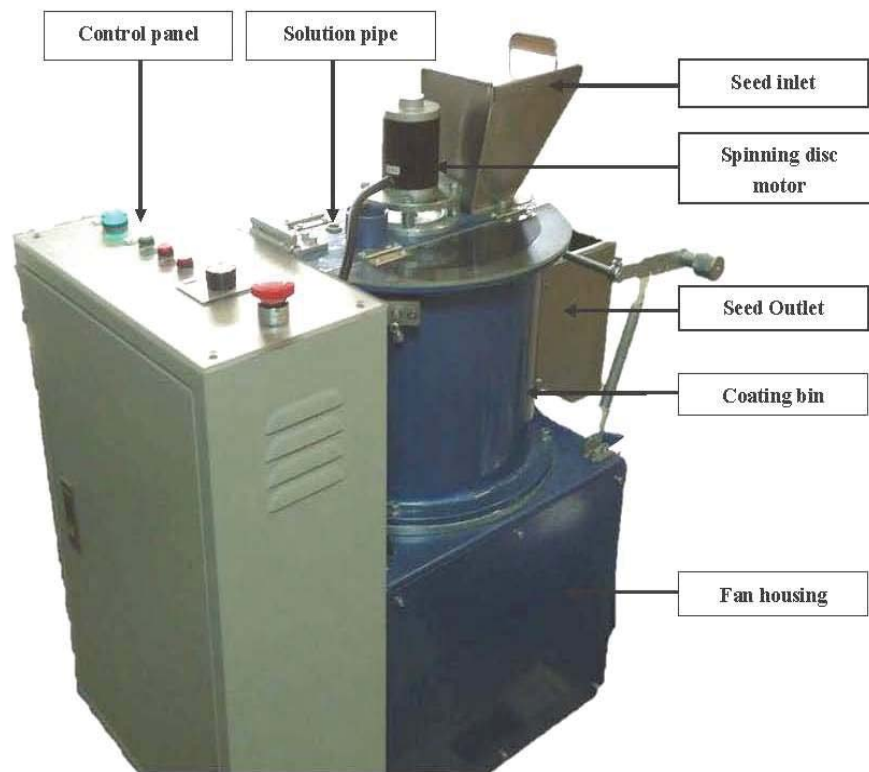

Power supply	Rotary disk	2,250 W, 380 VAC 50 Hz
	Spinning disk	100 W, 24 VDC
	Total power consumption	6 kW 380 VAC 3 Phase
	Adaptation to other power supplies are possible	

* Batch Capacity various on crop/species

** Capacities per Hrs. can also depend on various protocols and size/volume of seeds
