

## **RFBD600-19 Rotary Fluid Bed Dryer Ø600mm**

***Continuous dryer to keep up with the capacity of HR800 or bigger rotary coaters***

The RFBD600-19 system is our biggest available dryer at the moment. The RFBD600-19 can keep up with a HR800 rotary coater or even bigger ones. When combining more than one dryer the drying capacity also increases. When you give us the information about your rotary coating process and wanted humidity's we are capable to test and calculate the needed dryer(s). See also our special Integrated Coating Drying Systems catalogue for complete coating/drying installations.

### **Product Characteristics:**

- Adaptable to already used rotary coating systems
- Manual operated version available
- PLC and Touch panel controlled system available
- Capacity varies depending on your rotary coating process, when you give us the needed capacity, humidity and process variables we can dimension the dryer for you.
- Several air conditioning options available (depending on your process)
- Cooling section, with optional air cooling unit
- Different capacities/drying times available
- Ask us for more information about the system

**Due to the variety of coating processes and humidity conditions of your specific business we configure the dryers based on our test equipment. Ask us for more information about a dryer for your specific process.**

Double RFBD600-19 Dryer for grasscoat 1:1 1250kg/h
