## EasySow

### Recommended Uses

EasySow is a blend that can be used for an encrustment of large seeds such as sunflower or corn, this product when used in combination with one of our Seedworx Stix binders can bring this seed up to size with the rest of the seed lot eliminating those planting issues.

Colour and finishing effects can be added at the end of the process giving you a great looking product as well as an effective one.

### Features & Benefits

EasySow has an earthy tone with a tan/cream finish, it quickly and easily builds up the size of the seed and readily moulds to a smooth pellet shape.

- Easy to use encrusting blend
- Smooths irregular shaped seed
- Can be used to even seed size distribution.

Use	Coating Type			Properties					
	Film	Encrust	Pellet	Binding Capacity	Opacity	Finish	Flow Rating	Dust Control	Colour(s)
Pelleting blend	No	Yes	Yes	Low - Medium	High	Smooth	----	----	Tan/Cream

# EasySow

## Physical Properties

Form	Dry powder blend
Colour	Tan/Cream
Solubility	Insoluble

## Characteristics

Storage Instructions	Closed container, out of direct sunlight, protect from freezing
Shelf Life	24 months when stored correctly

## Application Guide

EasySow blend should be applied to wet seed, blend should be added gradually while spraying polymer mixture. For encrustment it is necessary that the product be applied using one of the products from the Seedworx Stix range to increase the coating strength and adherence. The amount required will depend on the seed type, pellet size and strength characteristics sought.
