Finishing Powder Gold

Recommended Uses

Seedworx Finishing Powder Gold is a high performance seed fluency powder formulation which gives the following characteristics:

- Good drying power
- Bright gold finish
- High opacity
- Compatible with most of the Seedworx range

Seedworx Finishing Powder Gold is aimed at seed coaters who are adding actives and polymers onto seed, near or beyond the absorption capacity of the seed.

Through its unique formulation it can be used on a very wide range of different seed types and has a bright shiny gold finish so that coated seed can be easily identified.

Use	Coating Type			Properties					
	Film	Encrust	Pellet	Binding Capacity	Opacity	Finish	Flow Rating	Dust Control	Colour(s)
Finishing	Yes	Yes*	Yes*	None	High	Sparkle/Gold	--	No	Gold

* when suitably diluted or as a final coating

Finishing Powder Gold

Physical Properties

Form	Dry powder blend
Colours	Gold
Solubility	Insoluble
Density	0.29 Untapped, 0.36 Tapped Density

Application Guide

Seedworx Finishing Powder Gold can be applied on to wet seed, it is advisable to use a polymer binder to hold the product onto the seed once it is dry. Seedworx Finishing Powder Gold can be used in combination with the Seedworx Stix range to aid with dust reduction. Seedworx Finishing Powder Gold can also be used with the full range of Seedworx Colours, to give a sparkly, gold coloured seed.

Storage and Packing

We recommend storage in a clean, dry area at ambient temperature. Material should be stored in original containers and kept closed when not in use. Shelf life of the product kept under these conditions is expected to be over 24 months.
